

Public Involvement Notice

Improvements to County D at Halfway Creek

The La Crosse County Highway Department is planning improvements for County D over Halfway Creek in the Town of Onalaska. Project information can be found in this notice or by contacting the individuals below.

The County D bridge project involves improvements to the roadway and bridge at the crossing of Halfway Creek approximately 0.3 miles north of County W. The proposed improvement will include the removal of the existing three-span timber bridge and construction of a new two-span concrete slab bridge. The 553-foot-long project will include replacement of the bridge at the existing location and 477 feet of roadway approaches. A temporary bypass will be constructed on the east side of the roadway.

During construction of the County D project, the road will be open to through traffic by use of a temporary bypass. Construction is anticipated to take approximately 3 months during 2024. The earliest construction could begin is May 15th due to in-stream work restrictions. The exact timeframe will be determined by the contractor based on their availability.

Additional right-of-way easements are anticipated to be needed to build the project and construct the temporary bypass.

Individuals are encouraged to contribute comments about the bridge project by December 30, 2022, by contacting the following individuals:
