----------------------------	------------------------------	--------------------------------------

OPERATOR - The violations in operating procedure or physical arrangement indicated below must be corrected by the next routine inspection or by a date specified in this report.

Comments:

Menu review and risk assessment conducted.

The inspection report software was malfunctioning at the time of the inspection and would not allow for violations to be entered.

1. freezer 3 head ice accumulation on a meat loaf product

2. lobby ice machine need to be properly air gapped.

discussed monitoring actual food temps is preferable to recording warmer, and cooler ambient air temps.

Any operator aggrieved by an order of this department under this chapter may request a hearing as provided in ch.227 statute, if state licensed, or a local ordinance if licensed by an agent health department.
